

FROM THE GOULBURN CITY COUNCIL

RATE BOOK OF 1882

AN ALPHABETICAL LISTING

The original rate book had no divisions which indicated in which sections properties were located.

beginning with Section 1, the pattern of numbering properties for assessment purposes appeared to be as follows : beginning at the south east corner of the section which was given the No. 1 assessment, by moving anticlockwise the properties were consecutively numbered round the section. Section 2 was then numbered in the same fashion, going anti-clockwise. Most Sections were numbered in this fashion, but with the higher section numbers, the starting point of numbering became obscured.

Most corner allotments gave both streets at the corner.

No attempt has been made to convert the pounds, shillings and pence values of the rates payable into the Metric system.

Several abbreviations were used in compiling the listing, mainly on account of space available on each line.

The main abbreviations used are :-

r or rms	= room(s)	b'smith	= blacksmith
Kit	= Kitchen	padd	= paddock
pt	= part or portion	l	= lot
Bar	= Hotel	in course	= building in
w'shop	= workshop	course of erection	
gard	= garden	wb	= weatherboard
cult.	= cultivated		
etc.	can mean many things e.g. shed, coach house, paddock, orchard, outhouse
