FROM THE 1878 GOULBURN CITY RATE BOOK

Every effort has been made to reproduce as accurately as possible all entries in the 1878 Rate Book of the Goulburn City Council, even to copying known spelling errors. However, there were times when the handwriting at times left some spelling open to doubt, for in 1878 all entries had to be made by hand, and the writing was neither copperplate nor in the style common at time of copying (1989).

On the following pages, the number on the left under the heading 'Assessment Number', is the number allotted to a rate notice ( which it is understood, all notices were delivered by hand ).

RATES at this time were generally one shilling (1/-) in the pound (£)

Rates payable were of the scale : 2 room property paid about 10/6 for the year  
 4 room property paid about £1/8/-     "     "  
 Hotel (according to size) about £7/17/6     "     "

In these listings, the aim has been to list people who actually lived in Goulburn. Even the copy of the Rates Book is not always clear whether the 'owner' or 'Lessee' was living in Goulburn.

In the supplementary lists, newspaper reports have been the main source of information on residents, but where doubt existed, those names were not considered. Principal sources of information were : birth notices, death notices, town gossip, cricket teams, police court reports, advertisements and such like. Occasionally newspaper reports gave lists of unclaimed letters, but as these could not be confirmed as bona fide residents, they were not used.

Among the 'owners' and 'lessees', two names stand out with multiple ownings or leasings. It is assumed that the name of Phillip Dignam whose name is associated with many properties was listed as being an 'agent', and that of A.G.Finlay, a known 'Agent' or Auctioneer.

Those people with the sign "+" adjacent to the name own or lease more than one property.

Council records do not show whether dwellings might be classed as tenements or terraces, whether constructed in brick or timber, villa or cottage, or whether single storey or more than one storey.

Various methods had been adopted in determining how the properties were located, but for 1878 it appears that one started at the south-east corner of a section and moved round the section in an anti-clockwise direction till the section had been completed and then moved on to the next section.

*J. J. Cross*
